

2010 IMERT-INVENT DOMESTIC PREPAREDNESS

Improving Provider Response to Chemical/Biological/Radiological/
Nuclear/Explosive/Mass Casualty Incident Events

Course Overview

Domestic Preparedness has been designed to assist agencies, organizations and individuals to improve preparedness for the health care consequences of CBRNE events and naturally occurring catastrophes. The course is intended to augment existing preparedness or other terrorism-related programs.

This 4-hour course is offered by the Illinois College of Emergency Physicians' Illinois Medical Emergency Response Team, and INVENT, the Illinois Nurse Team. The course is endorsed by the Illinois Department of Public Health, the Illinois Nurses Association, and supported by an ASPR grant.

Target Audience

Domestic Preparedness is appropriate for physicians, nurses, physician assistants, nurse practitioners, EMTs, first responders and non-medical community members with an interest in emergency preparedness and response to CBRNE/MCI events.

Course Objectives

- List and describe the basic concepts of the scenarios issued by the Department of Homeland Security: Nuclear Detonation; Biological Outbreak; Natural Disaster; and Chemical, Radiological, Explosive.
- Based on the Illinois Hazard Vulnerability Analysis, list and describe the four priority scenarios: tornadoes; earthquakes; pandemic flu; and explosions
- Identify challenges of caring for special needs populations in disasters
- Recall the mission, evolution and capabilities of IMERT and INVENT and how they relate to the Illinois emergency response system
- Detail the characteristics of the successful disaster response of first responders (physicians, nurses, EMT-P, EMT-B, and others)
- Define the issues related to altered standards of care specific to disasters
- Describe the challenges to recovery after an incident

March 16, 2010
Rock Island, IL 61201
